PROFESSIONAL SUMMARY

Java Full Stack Developer (C-DAC PGCP-AC) actively building production features at BoltBlazers using Spring Boot, PostgreSQL, and React. Hands-on experience designing REST APIs, implementing JWT/RBAC security, managing presigned-URL cloud uploads, and deploying containerized applications on AWS. Leverages a strong analytical foundation from an M.Sc. in Physics to solve complex data-handling challenges and deliver secure, scalable, end-to-end web solutions.

TECHNICAL SKILLS

Languages	:	Java, JavaScript (ES6+), SQL, Python
Backend	:	Spring Boot, Spring MVC, Spring Security (JWT, RBAC), Spring Data JPA/Hibernate, RESTful APIs
Backend (JS)	:	Node.js, Express.js
Frontend	:	React (Hooks, React Router), Vite, HTML5, CSS3, Tailwind CSS
Databases	:	PostgreSQL, MySQL
Testing & API	:	JUnit 5, Spring MockMvc (unit and integration testing), Postman, Swagger/OpenAPI
DevOps	:	Git/GitHub, Docker, AWS EC2, Cloudflare R2
Familiar	:	FastAPI, LangChain/RAG, Pandas, scikit-learn

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern | BoltBlazers.com (Abhay Education Pvt. Ltd.), Remote *Aug 2026–Present*

- Built 25+ REST APIs in Spring Boot and PostgreSQL for a web platform, covering JWT authentication, role-based access, user approval workflows, privacy controls and centralized exception handling.
- Developed a request-matching module with configurable limits, search and autocomplete endpoints.
- Implemented secure direct-to-cloud file uploads using presigned URLs on Cloudflare R2, with validation and access controls.
- Built the React frontend (Vite, Tailwind CSS) with protected routes, an admin console, dashboards and email notifications.
- Wrote JUnit 5 and Spring MockMvc integration tests covering access control, business rules and upload security.

EARLIER EXPERIENCE & TRAINING

Summer Analytics Intern in Data Science & ML | Consulting & Analytics Club, IIT Guwahati (Jun–Aug 2026): Python pipeline over 65,000+ travel records with Celonis dashboards.

AI/ML Trainee | CSIR-NEIST, Jorhat (Nov 2025–Jan 2026): Developed an object-oriented Python app for K-Means customer segmentation.

Data Analyst Intern | Sproutlife Foods (YogaBar) (Aug–Oct 2025): Wrote Python and SQL scripts for sales analysis and KPI tracking.

PROJECTS

AI-Powered Photography Services Platform | GitHub | Live Demo Link
React, Spring Boot, MySQL, FastAPI, LangChain/RAG, Docker, AWS EC2

- Built Spring Boot REST services with Spring Security, JWT, and RBAC; documented APIs in Swagger using layered controller–service–repository architecture.
- Developed responsive React UI integrated with backend APIs.
- Built a LangChain RAG chatbot exposed through FastAPI and containerized the full-stack app with Docker for AWS EC2 deployment.

Online Food Ordering & Room Rental Apps | GitHub Links
React, Node.js, Express.js, MySQL

- Built two CRUD web apps with REST APIs for menu/cart/order flows and rental listings/availability.
- Implemented request validation, error handling, and relational database schemas.
